## WHY CHOOSE AUSPHERE?

- ◆ We use the best & most powerful app building technology
- ◆ We offer dozens of powerful app features to cover all needs
- ◆ We help bring in new business & increase repeat customers
- ◆ Our apps are available on Both Apple & Google stores

### Mobile Apps

Mobile Apps is the latest technology that helps you attract more new customers – customers that spend more money, more frequently!

We can help you launch a successful mobile app to connect, communicate and keep your customers coming through the door again and again.

### Web Design

Web designing is an art! Your website design shows your business insight. A well known saying is "First impression is the lasting one". In web technologies, your website is the first entity that interacts with the visitor, so your website should speak itself!

### Proximity Beacon

Send your Ad to people's phones up to 180 metres away with **Proximity Plus**.

Proximity Marketing is a feature of the Google Near-by Platform. The first time a user encounters a Proxee they are asked if they wish to see the message the device is trying to send them. Best part is users don't need an app to receive notifications!

### Follow Us

### SEO with Ausphere

Ausphere can increase the search engine rank and site traffic of any company. The expertise offered by its technical and copywriting staff enables Ausphere to successfully meet the needs of companies with complex websites in competitive industries.

### Social Media Marketing

A powerful tool of communication, social media allows companies to reach their customers where they are, while also characterizing their brands and expanding their customer base. If done correctly, social media

marketing can also increase the efficacy of other marketing techniques (incl. SEO & SEM).
